CORE SKILLS

- Machine Learning & AI
- Generative AI & LLMs
- RAG Architectures
- Prompt Engineering
- ETL & Data Engineering
- BI & Data Visualization
- Process Automation
- Workflow Mapping
- Team Leadership
- Stakeholder Management

TECH STACK

Languages
Python · SQL · C# · C++

ML / AI
Gradient Boosting · ARIMA
NLP · LLMs · FAISS · BM25
RRF · CRAG · MLOps

BI & Visualization
Tableau · Power BI
Looker Studio · Excel

Data Platforms
GCP · Redshift · MySQL
SQL Server · Dataiku - BigQuery

AI & Automation Tools
Stylus Workspace AI Suite
Alteryx · RPA · Unreal Engine 5
ServiceNow · Salesforce

EDUCATION

M.S. Artificial Intelligence
Univ. Internacional de La Rioja
2024 – 2026 (In Progress)

B.S. Systems Engineering
Universidad Fidelitas

PROFESSIONAL SUMMARY

Data scientist and AI transformation leader with 8+ years of experience delivering ML, analytics, and automation initiatives across global organizations including Citi, Sysco, Equifax, and Walmart. Currently AVP at Citi's Global Payroll Services, applying AI tools, prompt engineering, and process automation to modernize payroll operations. Experienced in mentoring technical teams, mapping business requirements into technology solutions, and driving end-to-end AI initiatives — from RAG architectures to production BI dashboards. Proven record of influencing cross-functional stakeholders without direct authority.

PROFESSIONAL EXPERIENCE

Assistant Vice President | Sr. Digital Transformation Analyst
Citi – Global Payroll Services (GPS)
Heredia, Costa Rica - Mar 2025 – Present

- Lead digital transformation initiatives within Global Process Transformation (GPT), driving analytics and automation across Citi's global payroll operations.
- Design enterprise Tableau dashboards for KPI monitoring and operational transparency across regions.
- Map end-to-end process workflows and business requirements for technology implementation, bridging HR Operations, Payroll Tax, and Technology teams.
- Apply Stylus Workspace AI Suite — building custom presets and prompt engineering workflows to automate payroll process validations and reduce manual review cycles.
- Support PCT (Process Control Tool) integration and automation of compliance monitoring controls.
- Mentor both non-senior and senior analysts on data practices, dashboard development, and process improvement.

Professor – Executive Master's in Business Analytics
Universidad Latina de Costa Rica (ULATINA)
Remote - Oct 2025 – Present

- Teach graduate-level courses: Data Analytics & Business Strategies, and Data-Driven Decision Making.
- Lead and mentor cohorts of business executives on ML, BI strategy, and analytics application to real-world problems.
- Design case studies and assessment frameworks for applied analytics projects.

Senior Data Analyst
Sysco
Remote - Jun 2024 – Mar 2025

- Built a Gradient Boosting ML model (Fast Track Contract Builder) to predict contract profitability.
- Developed an NLP transaction classifier improving pricing analytics transparency.
- Engineered ETL pipelines using Alteryx, Python, and SQL; automated Tableau dashboards for leadership.

CERTIFICATIONS

- Dataiku ML Practitioner
- Dataiku Core Designer
- Alteryx Designer Core
- ML & AI for Business – TEC
- Scrum Fundamentals (SFC)
- Data Science Specialization
- Digital Marketing Specialist

RevOps Analytics Analyst II

Equifax

San José, Costa Rica - Nov 2023 – Jun 2024

- Built ML website classifier to identify e-commerce leads for go-to-market teams.
- Developed ARIMA forecasting models for revenue simulation and pipeline planning.
- Mentored junior and senior team members on analytics best practices and automation workflows.

Pricing Analyst (Planner)

Walmart

San José, Costa Rica - Dec 2021 – Nov 2023

- Built pricing analytics tools and ETL workflows for category management decisions.
- Developed Power BI dashboards for category performance monitoring.
- Performed geospatial competitor analysis using DBSCAN and GeoPandas.

PREVIOUS EXPERIENCE

Labcorp Drug Development – Associate Programmer | HPE – Pre-sales Solution Architect Intern | HP – Fleet Management Engineer | Amazon – Kindle Technical Support

INNOVATION PROJECT — MASTER'S RESEARCH

Conversational RAG System in a 3D Interactive Environment

Built a domain-specific Q&A system embedded in an Unreal Engine 5 environment featuring intelligent NPCs. Architecture includes FAISS vector search, BM25 keyword retrieval, Reciprocal Rank Fusion (RRF), and a self-correcting CRAG loop for high-accuracy retrieval and response generation.
